Kippen van vilt

Knip de onderdelen uit vilt en naai aan elkaar. Decoreer het plastic ei met Vivi Gade decoupage papier dat bestempeld is.

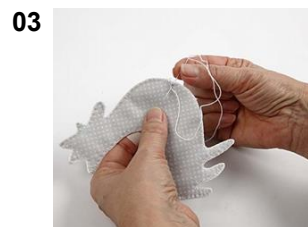

01

Cut a design from felt using the template.

02

Cut out the next design (mirror imaged) using the first as a template; it is easier like this.

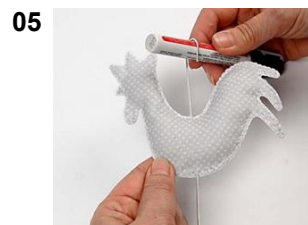

03

Sew the two parts together with buttonhole stitches. Leave an opening at the bottom.

04

Fill it with polyester stuffing. Sew together.

05

Cut a piece of bonsai wire and bend to form a hook which is then pushed through the felt chicken.

06

Dab some paint onto the silicone stamp.

07

Print on the decoupage paper. Use the large designs.

08

Push a hole through the egg and push a piece of wire through (to hold onto).

09

Glue small torn pieces of paper onto the egg.

10

Use the small stamps for printing Art Metal gold paint onto the eggs.

11

Tie a piece of flax twine around the egg.

12

Thread a bead, the egg and another bead onto the wire and finish by twisting to form a loop.

Decoupage lijmlak,
Glans, 250 ml
